

The all new MX4 from Industrial Scientific

A better way to do gas detection

MX4 iQuad Multigas Monitor features –

Sensors available LEL, O₂, CO,
H₂S, NO₂ & SO₂

Up to four gas sensors

Visual, audible & vibrating alarms

Large LCD screen

IECEX Intrinsic Safety Approval

iNet compatibility

Docking station ready

Compact, economical & with
a 2-year warranty

The MX4 iQuad is the latest release in gas detection technology from Industrial Scientific Corporation.

Rugged & Reliable

This tough little unit has a high-impact polycarbonate housing and protective rubber overmold. The MX4 is also third-party certified IP66 and IP67. That means it is dust-tight to withstand the dirtiest environments. And, it is water resistant; passing both water jet and submersion tests.

Powerful Alarms

To warn users in hazardous areas, the unit uses a combination of three alarms: ultra-bright LEDs; 95db audible alarm; and a powerful vibrating alarm.

iNet Compatible for Increased Safety, Cost Savings and Productivity

iNet is a software-based service that manages your fleet of gas detectors. iNet solves the most common gas detection problems. For example, iNet keeps people safe by providing visibility into alarms, exposure and usage. It keeps gas detectors working without costly and time-consuming maintenance.

Established in 1984, Air-Met is one of Australia's market leaders in the supply and service of cost-effective gas detection solutions.

Air-Met's fully trained and certified technicians, sales and rental staff, are ready to assist you in your gas detection needs via our six convenient locations nationally.
