

Air-Met Scientific

Equipment Service & Maintenance

OCCUPATIONAL HEALTH, SAFETY
& ENVIRONMENTAL MONITORING
EQUIPMENT SPECIALISTS

ALL REPAIRS SERVICED THROUGH OUR AIR-MET SERVICE CENTRES BY OUR QUALIFIED SERVICE TECHNICIANS ARE 100% GUARANTEED

What We Offer

- > Accredited NATA calibrations
- > Standard calibrations
- > Instrument repairs
- > On-site service and repairs
- > Original accessories and spare parts
- > Total care packages
- > Software and firmware updates

Workshop Capabilities

NATA Calibrations

- > ISO/IEC 17025 - Calibration of gas detectors including on site
- > ISO/IEC 17020 – Overhaul inspections associated with explosion protected equipment (Ex i)
- > ISO/IEC 17025 - Calibration and testing of air sampling pumps and flow meters

Standard Calibrations of:

- > Fixed and portable gas detectors
- > Air sampling pumps
- > Water quality instrumentation
- > Dust monitors
- > Heat stress monitors
- > Radiation meters
- > Sound level meters and dosimeters

Why Choose Air-Met

With more than 30,000 pieces of equipment maintained and repaired annually by Air-Met's experienced and qualified service technicians, we know better than anyone what it takes to ensure maximum longevity of your instruments, minimise downtime and improve plant performance.

Air-Met is also a NATA Accredited Facility and is only 1 of 4 Industrial Scientific Authorised Service Centres globally.

We recognise that businesses are busy at times or simply can't afford for equipment to be offsite. For this reason, we have a fleet of fully equipped mobile service vans to provide on-site service, maintenance and equipment management solutions.

Why Have Your Instruments Serviced By A NATA Accredited Facility?

Having your instruments certified gives you certainty in knowing the true accuracy of your instrumentation. This means you can have increased confidence your readings are valid and correct which is especially important when being audited to meet legislated industry standards. A NATA endorsed certificate from Air-Met Scientific gives true measurement traceability back to national standards.

Ensure Accuracy | Calibrations Services

Regular calibrations are necessary to ensure that your instruments are producing highly accurate measurements and fully functional.

ISO 9001 quality accredited and NATA accredited, Air-Met Service Centres offer a range of popular calibration services for a variety of occupational health, safety and environmental monitoring equipment.

Minimise Downtime | On-Site Service Support

In business, there is no time for downtime. For this reason, we have a fleet of fully equipped mobile service vans in all office locations nation-wide to provide on-site service, maintenance and equipment management solutions. Our offices also have an extensive fleet of dedicated rental instruments which can be hired whilst work is being carried out on your fleet. Call us today to discuss how we can support your instruments on-site.

Peace of Mind | Total Care Packages

Our ability to provide flexible tailored total care agreements ensure that our clients are able to get the level of service that they require whilst reducing the instrument's operational and maintenance costs and any long-term upgrades and lifecycle replacement expenditures.

Total Care Service Agreements provides certainty of your budget, minimise client operational and maintenance costs without comprising on compliance standards and ensures that your instruments are always maintained, calibrated and fully operational. Agreements are flexible and can be tailored to include extended warranties, repairs, training, product upgrades, telemetry applications and service plans.

SERVICE CAPABILITY

- > Fixed and Portable Gas Detectors (inc. PID & FID)
- > Environmental Monitoring Systems
- > Air Sampling Pumps
- > Heat-Stress Monitors
- > Air Flow Meters
- > Dust Monitors
- > Sound Level Meters and Noise Dosimeters
- > Vibration Meters
- > Mercury Vapour Detectors
- > Isocyanate Monitors
- > Water Quality Instrumentation

Our experienced service technicians are capable of servicing not only Air-Met brands so if it's not the list, give our teams a call on **1 800 000 744** or email us at service@airmet.com.au

AUTHORISED SERVICE CENTRES FOR:

- > Industrial Scientific Corporation (1 of 4 ISC Authorised Service Centres Globally)
- > Ion Science Ltd
- > SKC Inc
- > 3M Detection
- > TSI Inc (Quest Range)
- > Geotech Environmental
- > YSI Inc

WE LEAVE NOTHING TO CHANCE

Every instrument sent into Air-Met for service or calibration are checked for basic functionality issues and firmware updates. Preventative maintenance ensures maximum longevity of your instruments and firmware updates ensure the device is up to date!
