Battery Pack for AirChek 2000 Sample Pumps

Battery Replacement Notes:

- To retain history, ensure the pump has gone to SLEEP after the last run. The battery pack should not be removed while the pump is running.
- Replacing the battery pack may erase scheduled runs programmed with DataTrac 2000 software. After replacing the battery pack, use the software to reprogram the scheduled runs in the AirChek 2000 pump.
- Replacing the battery pack will erase sampling time, delayed start, and other settings entered using the pump keypad. Reset these parameters after replacing the battery pack.

1. To remove a battery pack, release the battery pack by removing the two security screws located on the bottom of the battery pack. Pull the battery pack away from the pump body.

2. To install a battery pack, carefully align the power connector on the replacement battery pack with the terminal on the bottom of the pump base plate and push the battery pack into place.

3. Replace and tighten the two security screws removed in Step 1.

4. Charge the new battery pack attached to or detached from the pump using only the charging jack on the **back** of the battery pack.

Battery attached to pump

Battery detached from pump

Cautions

- Use of a repaired or rebuilt battery pack voids any warranty and the UL Listing for intrinsic safety.
- Do not charge or operate pump from charger in hazardous locations!
- Use only an SKC-approved charger and battery pack designed for the AirChek® 2000 Sample Pump to ensure reliable performance. Failure to do so voids intrinsic safety and any warranty.
- Failure to follow warnings and cautions voids any warranty.
