

Introducing PURE Adapters™ by OHD

Be prepared now for the next threat

While CNP systems and traditional adapters do not increase exposure risks with respirator fit testing, customers asked for ways to improve adapter decontamination and enhance their filtration options.

You asked and we innovated

resulting in the OHD PURE Adapter which allows you to dial up your program based on the specific situation, climate and application. With OHD's traditional adapters still available, customers now have a full range of options for their program's specific requirements.

Contact Us

Key Features:

- Fully disassemble and sanitize
- 95% efficiency in-line filtration option
- Adjust & select your protection level

PURE Adapters are more easily and thoroughly cleaned and can be equipped with optional 95% in-line filtration. Further reduce already low levels of risk if not for any other reason than peace of mind. The PURE Adapter solution offers you the ounce of prevention that may be necessary to face whatever comes next.
